

Data/Telecoms Cabling Engineer

The Company

Established more than 30 years ago, we have transformed from a telephone system provider, to offering more comprehensive and tailored business communication and IT solutions.

These solutions include cloud based services, network services, telephone systems, cabling infrastructure and wireless networks, CCTV and IT/telephony support.

We utilise our 30 years of experience in business communications and IT to improve the customer's journey, manage staff performance and provide cost effective solutions, using the latest developments in technology - Anywhere, Any Place, Any Device

We believe every decision is a combination of emotions and not just logic.

To build on our growth and success, the business is now looking to add a Data/Telecoms cabling engineer to the team.

The engineer will report to the Operations Manager
